

ARROYO VISTA FAMILY HEALTH CENTER

How common is colorectal cancer?

Excluding skin cancers, colorectal cancer is the third most common cancer diagnosed in both men and women in the United States.

The American Cancer Society's estimates for the number of colorectal cancers in the United States for 2024 are:

- About 106,590 new cases of colon cancer (54,210 in men and 52,380 in women)
- About 46,220 new cases of rectal cancer (27,330 in men and 18,890 in women)

The rate of people being diagnosed with colon or rectal cancer each year has dropped overall since the mid- 1980s, mainly because more people are getting screened and changing their lifestyle related risk factors.
